IIE Transactions (2008) **40**, 1241–1256

DESIGN & MANUFACTURING

AUTHOR INDEX FOR 2008

Alagoz, O., B.A. Norman and A.E. Smith; *Determining aisle structures for facility designs using a hierarchy of algorithms*; November; 1019

Alp, O. and T. Tan; *Tactical capacity management under capacity flexibility*; March; 221

Altiok, T. and C.Z. Gurgur; *Decentralized multi-product multi-stage systems with backorders*; March; 238

Bartholdi, J.J., III and S.T. Hackman; *Allocating space in a forward pick area of a distribution center for small parts*; November; 1046

Bartholdi, J.J., K.R. Gue, R.D. Meller and J.S. Usher; *Foreword*; November; 1005

Blumenfeld, D.E., J. Li and S.P. Marin; *Production system design for quality robustness*; March; 162

Bozer, Y.A. and H.J. Carlo; *Optimizing inbound and outbound door assignments in less-than-truckload crossdocks*; November; 1007

Buzacott, J., S.B. Gershwin, G. Liberopoulos, S.M. Meerkov, C. Papadopoulos, J.M. Smith and B. Tan; *Foreword*; March; 161

Carlo, H.J. and Y.A. Bozer; *Optimizing inbound and outbound door assignments in less-than-truckload crossdocks*; November; 1007

Çetinkaya, S., E. Tekin and C.-Y. Lee; *A stochastic model for joint inventory and outbound shipment decisions*; March; 324

Colledani, M., F. Gandola, A. Matta and T. Tolio; *Performance evaluation of linear and non-linear multi-product multi-stage lines with unreliable machines and finite homogeneous buffers*; June; 612

De Kok, A.G., B. Selçuk and J.C. Fransoo; *Work-in-process clearing in supply chain operations planning*; March; 206

de Koster, R. and M. Yu; *Performance approximation and design of pick-and-pass order picking systems*; November; 1054

de Koster, R. and Y. Gong; *A polling-based dynamic order picking system for online retailers*; November; 1070

Disney, S.M., M. Lambrecht, D.R. Towill and W. Van de Velde; *The value of coordination in a two-echelon supply chain*; March; 341

Dooly, D.R. and H.F. Lee; *A shift-based sequencing method for twin-shuttle automated storage and retrieval systems*; June; 586

Down, D.G., C.-H. Wu and M.E. Lewis; *Heuristics for allocation of reconfigurable resources in a serial line with reliability considerations*; June; 595

Edgar, T.F.; *Book Review of Nonlinear Programming: Theory and Algorithms, 3rd Edition*; June; 627

Etman, L.F.P., A.A.A. Kock and J.E. Rooda; *Effective process times for multi-server flowlines with finite buffers*; March; 177

Fransoo, J.C., B. Selçuk and A.G. De Kok; *Work-in-process clearing in supply chain operations planning*; March; 206

Gandola, F., M. Colledani, A. Matta and T. Tolio; *Performance evaluation of linear and non-linear multi-product multi-stage lines with unreliable machines and finite homogeneous buffers*; June; 612

Gaukler, G.M. and W.H. Hausman; *RFID in mixed-model automotive assembly operations: Process and quality cost savings*; November; 1083

Gershwin, S.B., J. Buzacott, G. Liberopoulos, S.M. Meerkov, C. Papadopoulos, J.M. Smith and B. Tan; *Foreword*; March; 161

Gershwin, S.B. and J. Kim; *Analysis of long flow lines with quality and operational failures*; March; 284

Gong, Y. and R. de Koster; *A polling-based dynamic order picking system for online retailers*; November; 1070

Gue, K.R., J.J. Bartholdi, R.D. Meller and J.S. Usher; *Foreword*; November; 1005

Gurgur, C.Z. and T. Altiok; *Decentralized multi-product multi-stage systems with backorders*; March; 238

Hackman, S.T. and J.J. Bartholdi III; *Allocating space in a forward pick area of a distribution center for small parts*; November; 1046

Hausman, W.H. and G.M. Gaukler; *RFID in mixed-model automotive assembly operations: Process and quality cost savings*; November; 1083

Hua, W. and C. Zhou; *Clusters and filling-curve-based storage assignment in a circuit board assembly kitting area*; June; 569

Katsaros, A. and S. Papachristos; *A periodic-review inventory model in a fluctuating environment*; March; 356

Kazaz, B. and T.W. Sloan; *Production policies under deteriorating process conditions*; March; 187

Kim, J. and S.B. Gershwin; *Analysis of long flow lines with quality and operational failures*; March; 284

Kock, A.A.A., L.F.P. Etman and J.E. Rooda; *Effective process times for multi-server flowlines with finite buffers*; March; 177

Krieg, G.N. and H. Kuhn; *Performance evaluation of two-stage multi-product kanban systems*; March; 265

Krishnamurthy, A. and K. Satyam; *Performance evaluation of a multi-product system under CONWIP control*; March; 252

Kuhn, H. and G.N. Krieg; *Performance evaluation of two-stage multi-product kanban systems*; March; 265

Lambrecht, M., S.M. Disney, D.R. Towill and W. Van de Velde; *The value of coordination in a two-echelon supply chain*; March; 341

Lee, C.-Y., S. Çetinkaya and E. Tekin; *A stochastic model for joint inventory and outbound shipment decisions*; March; 324

Lee, H.F. and D.R. Dooly; *A shift-based sequencing method for twin-shuttle automated storage and retrieval systems*; June; 586

Lewis, M.E., C.-H. Wu and D.G. Down; *Heuristics for allocation of reconfigurable resources in a serial line with reliability considerations*; June; 595

Li, J., D.E. Blumenfeld and S.P. Marin; *Production system design for quality robustness*; March; 162

Liberopoulos, G., J. Buzacott, S.B. Gershwin, S.M. Meerkov, C. Papadopoulos, J.M. Smith and B. Tan; *Foreword*; March; 161

Marin, S.P., J. Li and D.E. Blumenfeld; *Production system design for quality robustness*; March; 162

Matta, A., M. Colledani, F. Gandola and T. Tolio; *Performance evaluation of linear and non-linear multi-product multi-stage lines with unreliable machines and finite homogeneous buffers*; June; 612

McGinnis, L.F. and D. Nazzal; *Throughput performance analysis for closed-loop vehicle-based material handling systems*; November; 1097

Meerkov, S.M., J. Buzacott, S.B. Gershwin, G. Liberopoulos, C. Papadopoulos, J.M. Smith and B. Tan; *Foreword*; March; 161

Meerkov, S.M. and L. Zhang; *Transient behavior of serial production lines with Bernoulli machines*; March; 297

Meller, R.D., J.J. Bartholdi, K.R. Gue and J.S. Usher; *Foreword*; November; 1005

0740-817X © 2008 "IIE"

Nazzal, D. and L.F. McGinnis; *Throughput performance analysis for closed-loop vehicle-based material handling systems*; November; 1097
Norman, B.A., O. Alagoz and A.E. Smith; *Determining aisle structures for facility designs using a hierarchy of algorithms*; November; 1019

Papachristos, S. and A. Katsaros; *A periodic-review inventory model in a fluctuating environment*; March; 356
Papadopoulos, C., J. Buzacott, S.B. Gershwin, G. Liberopoulos, S.M. Meerkov, J.M. Smith and B. Tan; *Foreword*; March; 161

Rooda, J.E., A.A.A. Kock and L.F.P. Etman; *Effective process times for multi-server flowlines with finite buffers*; March; 177
Roodbergen, K.J., G.P. Sharp and I.F.A. Vis; *Designing the layout structure of manual order picking areas in warehouses*; November; 1032

Satyam, K. and A. Krishnamurthy; *Performance evaluation of a multi-product system under CONWIP control*; March; 252
Selçuk, B., J.C. Fransoo and A.G. De Kok; *Work-in-process clearing in supply chain operations planning*; March; 206
Sharp, G.P., K.J. Roodbergen and I.F.A. Vis; *Designing the layout structure of manual order picking areas in warehouses*; November; 1032
Sloan, T.W. and B. Kazaz; *Production policies under deteriorating process conditions*; March; 187
Smith, A.E., O. Alagoz and B.A. Norman; *Determining aisle structures for facility designs using a hierarchy of algorithms*; November; 1019
Smith, J.M., J. Buzacott, S.B. Gershwin, G. Liberopoulos, S.M. Meerkov, C. Papadopoulos and B. Tan; *Foreword*; March; 161

Tagaras, G. and C. Zikopoulos; *On the attractiveness of sorting before disassembly in remanufacturing*; March; 313
Tan, T. and O. Alp; *Tactical capacity management under capacity flexibility*; March; 221
Tan, B., J. Buzacott, S.B. Gershwin, G. Liberopoulos, S.M. Meerkov, C. Papadopoulos, J.M. Smith; *Foreword*; March; 161
Tekin, E., S. Çetinkaya and C.-Y. Lee; *A stochastic model for joint inventory and outbound shipment decisions*; March; 324
Tolio, T., M. Colledani, F. Gandola and A. Matta; *Performance evaluation of linear and non-linear multi-product multi-stage lines with unreliable machines and finite homogeneous buffers*; June; 612
Towill, D.R., S.M. Disney, M. Lambrecht and W. Van de Velde; *The value of coordination in a two-echelon supply chain*; March; 341

Usher, J.S., J.J. Bartholdi, K.R. Gue and R.D. Meller; *Foreword*; November; 1005

Van de Velde, W., S.M. Disney, M. Lambrecht and D.R. Towill; *The value of coordination in a two-echelon supply chain*; March; 341
Vis, I.F.A., K.J. Roodbergen and G.P. Sharp; *Designing the layout structure of manual order picking areas in warehouses*; November; 1032

Wu, C.-H., D.G. Down and M.E. Lewis; *Heuristics for allocation of reconfigurable resources in a serial line with reliability considerations*; June; 595

Yu, M. and R. de Koster; *Performance approximation and design of pick-and-pass order picking systems*; November; 1054

Zhang, L. and S.M. Meerkov; *Transient behavior of serial production lines with Bernoulli machines*; March; 297
Zhou, C. and W. Hua; *Clusters and filling-curve-based storage assignment in a circuit board assembly kitting area*; June; 569
Zikopoulos, C. and G. Tagaras; *On the attractiveness of sorting before disassembly in remanufacturing*; March; 313

KEYWORDS INDEX FOR 2008

aggregate modeling, 177
aggregation, 612
aisle construction, 1019
aisle, 1019
analytical queueing approximation, 177
automated storage and retrieval systems, 586
automotive assembly, 1083
automotive paint shops, 162

backorders, 238
Bernoulli reliability model, 297
blocking, 177, 1097
bulk arrival order/demand processes, 324
bullwhip, 341

capacity management, 221
circuit board, 569
clearing functions, 206
closed queuing network, 252
cluster, 569
CONWIP, 252
crossdocks, 1007
cubic order index, 569
curve, 569

decentralized systems, 238
decomposition, 612
deterministic inventory theory, 1046
disassembly, 313
discrete-event simulation, 177
distance estimation, 1032
distribution, 1046
dynamic order picking system, 1070
dynamic programming, 356

effective process time, 177

facility layout design, 1019
facility logistics, 1070
filling, 569
finite buffer capacity, 177
first time quality, 162
fixed costs, 221
flexible capacity, 221
flow lines, 612
fluctuating environment, 356
fork/join stations, 252
forward pick area, 1046
freight consolidation, 324

genetic algorithms, 1019
global optimization, 341
grouping, 569

heuristic, 1019
hierarchical planning, 206

imperfect sorting, 313
inventory control, 324
inventory variance, 341
inventory, 221, 356

kanban system, 265
kitting, 569

local optimization, 341
logistics, 1007

Markov chain, 265
Markov chains, 1097
Markov decision processes, 595
Markov model, 284
material handling, 1007, 1097
metaheuristics, 1007
multi-product systems, 252
multi-product, 238, 612
multi-stage, 238

online retailer, 1070
operational failures, 284
order picking, 569, 1032, 1046, 1054
outbound transportation, 324
overtime production, 221

parametric decomposition, 252
performance analysis, 177
performance evaluation, 265
pick-and-pass, 1054
pick-to-light, 1083
planned lead times, 206
process deterioration, 187
production lines, 284, 297
production policies, 187
production system design, 162
production, 221
production/inventory system, 265
pull systems, 252
pull-type, 238

quality failures, 284
quality robustness, 162
queueing system, 265
queuing, 1054

random yield, 313
reliability, 595
remanufacturing, 313
renewal function approximations, 324
renewal theory, 324
repair and rework, 162
retrieval sequencing, 586
RFID, 1083
routing, 1032

semi-Markov decision process, 187
semiconductor manufacturing, 1097
stochastic modeling, 265
stochastic ordering, 356
stochastic scheduling theory, 595
stochastic, 1054
stopping time, 324
storage, 569
supply chain, 206
supply chains, 341

temporary workforce, 221
transient behavior, 297
transportation, 1007
two-moment approximations, 252

variable capacity, 356

warehousing, 1032, 1046, 1054, 1070
work-in-process, 206

REFEREES FOR 2008

G. Aiello, University of Palermo, Italy
V. Allada, University of Missouri, Rolla, MO
Jalal Ashayeri, Tilburg University, The Netherlands
Ronald G. Askin, Arizona State University

Baris Balcioglu, University of Toronto, Canada
Rajan Batta, The University at Buffalo
Denis Borenstein, Universidade Federal do Rio Grande do Sul - UFRGS
Yavuz Bozer, The University of Michigan

Hector Carlo, University of Puerto Rico, Mayaguez
Wei Chen, Northwestern University
Chih-Hsing Chu, National Tsing Hua University
Frederico Cruz, Universidade Federal de Minas Gerais, Brazil

Rene de Koster, Erasmus University, The Netherlands
Alexandros Diamantidis, Aristotle University of Thessaloniki, Greece
Gail DePuy, University of Louisville, Kentucky

Mohsen El Hafsi, University of California, Riverside

Jose M. Framinan, Escuela Superior de Ingenieros, Seville, Spain
Richard L. Francis, The University of Florida
Kai Furmans, University of Karlsruhe, Germany

Jean-Philippe Gayon, Grenoble Institute of Technology, France
Esma Gel, Arizona State University
Yigal Gerchak, Tel Aviv University, Israel
Wendell Gilland, University of North Carolina
Marc Goetschalckx, Georgia Institute of Technology
Abhijit Gosavi, The University at Buffalo

Stephen Graves, Massachusetts Institute of Technology
Yongpei Guan, The University of Oklahoma, Norman
Kevin Gue, Auburn University

Steven Hackman, Georgia Institute of Technology
John Hasenbein, University of Texas, Austin
Cathal Heavey, University of Limerick, Ireland
Stefan Helber, Leibniz Universitat, Hannover, Germany
Sundaresh S. Heragu, University of Louisville
Kai Huang, University of Technology, Eindhoven, The Netherlands
Wenzhen Huang, University of Massachusetts at Dartmouth

Angus Jeang, Feng Chia University

Manjunath Kamath, Oklahoma State University
Laoucine Kerbache, HEC School of Management, France
David Kim, Oregon State University
Bahattin Koc, The University at Buffalo
Vassilis Kouikoglou, Technical University of Crete, Greece
Ananth Krishnamurthy, University of Wisconsin, Madison
Heinrich Kuhn, The Catholic University of Eichstätt-Ingolstadt, Germany

Kemper Lewis, University at Buffalo – SUNY
J.T. Li, Autodesk Asia Private Ltd., Singapore
Jingshan Li, University of Kentucky
George Liberopoulos, University of Thessaly, Greece

Roland Malhame, Ecole Polytechnique, Montreal, Canada
Leon McGinnis, Georgia Institute of Technology
Timothy Middelkoop, The University of Florida
Chiung Moon, Yonsei University

Rakesh Nagi, University of Buffalo, New York
Dima Nazzal, University of Central Florida

Pratik J. Parikh, Virginia Polytechnic Institute
Letitia Pohl, University of Arkansas
Jean-Marie Proth, INRIA, France

Peng Qingjin, University of Manitoba

Kees Jan Roodbergen, Erasmus University, The Netherlands
Manuel Rosetti, University of Arkansas
Sarah Ryan, Iowa State University

Marc Schleyer, University of Karlsruhe, Germany
Armin Scholl, University of Jena, Germany
Shraga Shoval, University of South Australia
Alice Smith, Auburn University
Jeanette Song, Duke University
Shi Ji Song, Tsinghua University, China
Sriram Subramanian, Georgia Institute of Technology

Baris Tan, Koc University, Istanbul, Turkey
Geo-Ry Tang, National Taiwan University of Science and Technology

Timothy L. Urban, The University of Tulsa

Mark Van Oyen, The University of Michigan
Tom Van Woensel, University of Technology, Eindhoven, The Netherlands
Jayendran Venkateswaran, Indian Institute of Technology, Bombay, India
Jose Ventura, Pennsylvania State University
Iris Vis, Vrije Universiteit Amsterdam

Hartanto Wong, Cardiff University, UK

Ali Yalcin, University of South Florida
Jyh-Cheng Yu, National Kaohsiung First University of Science and Technology
Xue-Ming Yuan, Singapore Institute of Manufacturing Technology, Singapore

Chen Zhou, Georgia Institute of Technology

SCHEDULING & LOGISTICS

AUTHOR INDEX FOR 2008

Aboolian, R., O. Berman and Z. Drezner; *Location and allocation of service units on a congested network*; April; 422
Almiñana, M., L.F. Escudero, M. Landete, J.F. Monge, A. Rabasa and J. Sánchez-Soriano; *On a mixed zero–one separable non-linear approach for water irrigation scheduling*; April; 398

Berman, O., R. Aboolian and Z. Drezner; *Location and allocation of service units on a congested network*; April; 422
Berman, O., Z. Drezner, Q. Wang and G.O. Wesolowsky; *The route expropriation problem*; April; 468
Bılgıç, T., E. Kayış and D. Karabulut; *A note on the can-order policy for the two-item stochastic joint-replenishment problem*; January; 84
Billaut, J.-C., I. Gribkovskaia and V. Strusevich; *An improved approximation algorithm for the two-machine open shop scheduling problem with family setup times*; April; 478
Birge, J.R., S.E. Grasman and T.L. Olsen; *Setting basestock levels in multiproduct systems with setups and random yield*; December; 1158
Bollapragada, S. and S. Mallik; *Managing on-air ad inventory in broadcast television*; December; 1107

Caggiano, K.E. and P.L. Jackson; *Finding minimum flow time cyclic schedules for non-identical, multistage jobs*; January; 45
Camm, J.D., M.J. Magazine, G.G. Polak and G.S. Zarik; *Scheduling parallel assembly workstations to minimize a shared pool of labor*; August; 749
Cassady, C.R., L.M. Maillart and J. Honeycutt; *A binomial approximation of lot yield under Markov modulated Bernoulli item yield*; April; 459
Çetinkaya, S., H. Üster and B.B. Keskin; *Integrated warehouse location and inventory decisions in a three-tier distribution system*; August; 718
Chen, Z.-L. and C.-L. Li; *Scheduling with subcontracting options*; December; 1171
Cheung, K.L. and S.H. Zhang; *Balanced and synchronized ordering in supply chains*; January; 1

Daskin, M.S., T. İlhan and S.M.R. Iravani; *The orienteering problem with stochastic profits*; April; 406
De Reyck, B. and R. Leus; *R&D project scheduling when activities may fail*; April; 367
Drexl, A. and Y. Nikulin; *Multicriteria airport gate assignment and Pareto simulated annealing*; April; 385
Drezner, Z., O. Berman, Q. Wang and G.O. Wesolowsky; *The route expropriation problem*; April; 468
Drezner, Z., R. Aboolian and O. Berman; *Location and allocation of service units on a congested network*; April; 422

Elhedhli, S. and F. Gzara; *Integrated design of supply chain networks with three echelons, multiple commodities and technology selection*; January; 31
Erhun, F., P. Keskinocak and S. Tayur; *Dynamic procurement in a capacitated supply chain facing uncertain demand*; August; 733
Escudero, L.F., M. Almiñana, M. Landete, J.F. Monge, A. Rabasa and J. Sánchez-Soriano; *On a mixed zero–one separable non-linear approach for water irrigation scheduling*; April; 398

Ganesh, M., S. Raghunathan and C. Rajendran; *The value of information sharing in a multi-product supply chain with product substitution*; December; 1124
Geismar, H.N., M. Pinedo and C. Sriskandarajah; *Robotic cells with parallel machines and multiple dual gripper robots: a comparative overview*; December; 1211
Goren, S. and I. Sabuncuoglu; *Robustness and stability measures for scheduling: single-machine environment*; January; 66
Grasman, S.E., T.L. Olsen and J.R. Birge; *Setting basestock levels in multiproduct systems with setups and random yield*; December; 1158
Gribkovskaia, I., J.-C. Billaut and V. Strusevich; *An improved approximation algorithm for the two-machine open shop scheduling problem with family setup times*; April; 478
Griffin, P.M., P. Pekgün and P. Keskinocak; *Coordination of marketing and production for price and leadtime decisions*; January; 12
Gürler, Ü. and B.Y. Özkaya; *Analysis of the (s, S) policy for perishables with a random shelf life*; August; 759
Gzara, F. and S. Elhedhli; *Integrated design of supply chain networks with three echelons, multiple commodities and technology selection*; January; 31

Ha, A.Y. and Q. Li; *Reactive capacity and inventory competition under demand substitution*; August; 707
Honeycutt, J., L.M. Maillart and C.R. Cassady; *A binomial approximation of lot yield under Markov modulated Bernoulli item yield*; April; 459

İlhan, T., S.M.R. Iravani and M.S. Daskin; *The orienteering problem with stochastic profits*; April; 406
Iravani, S.M.R., T. İlhan and M.S. Daskin; *The orienteering problem with stochastic profits*; April; 406

Jackson, P.L. and K.E. Caggiano; *Finding minimum flow time cyclic schedules for non-identical, multistage jobs*; January; 45
Johnson, E.L. and T.S.A. Ng; *Production planning with flexible customization using a branch-price-cut method*; December; 1198

Karabulut, D., E. Kayış and T. Bılgıç; *A note on the can-order policy for the two-item stochastic joint-replenishment problem*; January; 84
Kayış, E., T. Bılgıç and D. Karabulut; *A note on the can-order policy for the two-item stochastic joint-replenishment problem*; January; 84
Keskin, B.B., H. Üster and S. Çetinkaya; *Integrated warehouse location and inventory decisions in a three-tier distribution system*; August; 718
Keskinocak, P., F. Erhun and S. Tayur; *Dynamic procurement in a capacitated supply chain facing uncertain demand*; August; 733
Keskinocak, P., P. Pekgün and P.M. Griffin; *Coordination of marketing and production for price and leadtime decisions*; January; 12
Kim, S. and R. Uzsoy; *Exact and heuristic procedures for capacity expansion problems with congestion*; December; 1185

Landete, M., M. Almiñana, L.F. Escudero, J.F. Monge, A. Rabasa and J. Sánchez-Soriano; *On a mixed zero–one separable non-linear approach for water irrigation scheduling*; April; 398
Leus, R. and B. De Reyck; *R&D project scheduling when activities may fail*; April; 367
Li, C.-L. and Z.-L. Chen; *Scheduling with subcontracting options*; December; 1171
Li, Q. and A.Y. Ha; *Reactive capacity and inventory competition under demand substitution*; August; 707
Li, Q., H. Xu and S. Zheng; *Periodic-review inventory systems with random yield and demand: Bounds and heuristics*; April; 434
Liu, J. and Z. Zhou; *A heuristic algorithm for the two-hoist cyclic scheduling problem with overlapping hoist coverage ranges*; August; 782

Magazine, M.J., J.D. Camm, G.G. Polak and G.S. Zarik; *Scheduling parallel assembly workstations to minimize a shared pool of labor*; August; 749

Maillart, L.M., C.R. Cassady and J. Honeycutt; *A binomial approximation of lot yield under Markov modulated Bernoulli item yield*; April; 459
Mallik, S. and S. Bollapragada; *Managing on-air ad inventory in broadcast television*; December; 1107
Mati, Y. and X. Xie; *A genetic-search-guided greedy algorithm for multi-resource shop scheduling with resource flexibility*; December; 1228
Moinzadeh, K. and Y.-P. Zhou; *Incorporating a delay mechanism in ordering policies into multi-echelon distribution systems*; April; 445
Monge, J.F., M. Almiñana, L.F. Escudero, M. Landete, A. Rabasa and J. Sánchez-Soriano; *On a mixed zero–one separable non-linear approach for water irrigation scheduling*; April; 398

Ng, T.S.A. and E.L. Johnson; *Production planning with flexible customization using a branch-price-cut method*; December; 1198
Nikulin, Y. and A. Drexl; *Multicriteria airport gate assignment and Pareto simulated annealing*; April; 385

Olsen, T.L., S.E. Grasman and J.R. Birge; *Setting basestock levels in multi-product systems with setups and random yield*; December; 1158
Özer, Ö. and H. Xiong; *Stock positioning and performance estimation for distribution systems with service constraints*; December; 1141
Özkaya, B.Y. and Ü. Gürler; *Analysis of the (s, S) policy for perishables with a random shelf life*; August; 759
Ozsen, L., K. Sourirajan and R. Uzsoy; *Erratum for "A single product network design model with lead time and safety stock considerations"*; August; 795

Pekgün, P., P.M. Griffin and P. Keskinocak; *Coordination of marketing and production for price and leadtime decisions*; January; 12
Pinedo, M., H.N. Geismar and C. Sriskandarajah; *Robotic cells with parallel machines and multiple dual gripper robots: a comparative overview*; December; 1211
Polak, G.G., J.D. Camm, M.J. Magazine and G.S. Zarik; *Scheduling parallel assembly workstations to minimize a shared pool of labor*; August; 749

Rabasa, A., M. Almiñana, L.F. Escudero, M. Landete, J.F. Monge and J. Sánchez-Soriano; *On a mixed zero–one separable non-linear approach for water irrigation scheduling*; April; 398
Raghunathan, S., M. Ganesh and C. Rajendran; *The value of information sharing in a multi-product supply chain with product substitution*; December; 1124
Rajendran, C., M. Ganesh and S. Raghunathan; *The value of information sharing in a multi-product supply chain with product substitution*; December; 1124

Sabuncuoglu, I. and S. Goren; *Robustness and stability measures for scheduling: single-machine environment*; January; 66
Sánchez-Soriano, J., M. Almiñana, L.F. Escudero, M. Landete, J.F. Monge and A. Rabasa; *On a mixed zero–one separable non-linear approach for water irrigation scheduling*; April; 398
Sourirajan, K., L. Ozsen and R. Uzsoy; *Erratum for "A single product network design model with lead time and safety stock considerations"*; August; 795
Sriskandarajah, C., H.N. Geismar and M. Pinedo; *Robotic cells with parallel machines and multiple dual gripper robots: a comparative overview*; December; 1211
Strusevich, V., J.-C. Billaut and I. Gribkovskaia; *An improved approximation algorithm for the two-machine open shop scheduling problem with family setup times*; April; 478

Tayur, S., F. Erhun and P. Keskinocak; *Dynamic procurement in a capacitated supply chain facing uncertain demand*; August; 733

Üster, H., B.B. Keskin and S. Çetinkaya; *Integrated warehouse location and inventory decisions in a three-tier distribution system*; August; 718
Uzsoy, R. and S. Kim; *Exact and heuristic procedures for capacity expansion problems with congestion*; December; 1185
Uzsoy, R., K. Sourirajan and L. Ozsen; *Erratum for "A single product network design model with lead time and safety stock considerations"*; August; 795

Wang, Q., O. Berman, Z. Drezner and G.O. Wesolowsky; *The route expropriation problem*; April; 468
Wesolowsky, G.O., O. Berman, Z. Drezner and Q. Wang; *The route expropriation problem*; April; 468

Xie, X. and Y. Mati; *A genetic-search-guided greedy algorithm for multi-resource shop scheduling with resource flexibility*; December; 1228
Xiong, H. and Ö. Özer; *Stock positioning and performance estimation for distribution systems with service constraints*; December; 1141
Xu, H., Q. Li and S. Zheng; *Periodic-review inventory systems with random yield and demand: Bounds and heuristics*; April; 434

Zarik, G.S., J.D. Camm, M.J. Magazine and G.G. Polak; *Scheduling parallel assembly workstations to minimize a shared pool of labor*; August; 749
Zhang, S.H. and K.L. Cheung; *Balanced and synchronized ordering in supply chains*; January; 1
Zheng, S., Q. Li and H. Xu; *Periodic-review inventory systems with random yield and demand: Bounds and heuristics*; April; 434
Zhou, Y.-P. and K. Moinzadeh; *Incorporating a delay mechanism in ordering policies into multi-echelon distribution systems*; April; 445
Zhou, Z. and J. Liu; *A heuristic algorithm for the two-hoist cyclic scheduling problem with overlapping hoist coverage ranges*; August; 782

OPERATIONS ENGINEERING

AUTHOR INDEX FOR 2008

Angus, D.C., J.E. Kreke, M.D. Bailey, A.J. Schaefer and M.S. Roberts; *Modeling hospital discharge policies for patients with pneumonia-related sepsis*; September; 853

Bailey, M.D., J.E. Kreke, A.J. Schaefer, D.C. Angus and M.S. Roberts; *Modeling hospital discharge policies for patients with pneumonia-related sepsis*; September; 853
Bailey, M.D., S.M. Shechter and A.J. Schaefer; *A modeling framework for replacing medical therapies*; September; 861
Benneyan, J., S. Kachhal and R. Rardin; *Foreword*; September; 799
Billo, R.E.; *Book Review of Design of Industrial Information Systems*; May; 565
Brusco M.J.; *An exact algorithm for a workforce allocation problem with application to an analysis of cross-training policies*; May; 495

Çelik, S., I. Sabuncuoglu and M.M. Fadiloglu; *Variance reduction techniques: Experimental comparison and analysis for single systems*; May; 538
Chen, V.C.P., V.L. Pilla, J.M. Rosenberger and B. Smith; *A statistical computer experiments approach to airline fleet assignment*; May; 524
Coit D.W. and H.A. Taboada; *Multi-objective scheduling problems: Determination of pruned Pareto sets*; May; 552

Das, T.K., A.A. Savachkin and Y. Zhu; *A large-scale simulation model of pandemic influenza outbreaks for development of dynamic mitigation strategies*; September; 893
Denton, B. and D. Gupta; *Appointment scheduling in health care: Challenges and opportunities*; September; 800
Dessouky, M. I. Sungur and F. Ordóñez; *A robust optimization approach for the capacitated vehicle routing problem with demand uncertainty*; May; 509

Fadiloglu, M.M., I. Sabuncuoglu and S. Çelik; *Variance reduction techniques: Experimental comparison and analysis for single systems*; May; 538

Griffin, P.M., C.R. Scherrer and J.L. Swann; *Optimization of community health center locations and service offerings with statistical need estimation*; September; 880
Gupta, D. and B. Denton; *Appointment scheduling in health care: Challenges and opportunities*; September; 800

Kachhal, S., J. Benneyan and R. Rardin; *Foreword*; September; 799
Kapur, K.C. and Y.-W. Liu; *New patient-centered models of quality-of-life measures for evaluation of interventions for multi-stage diseases*; September; 870
Kreke, J.E., M.D. Bailey, A.J. Schaefer, D.C. Angus and M.S. Roberts; *Modeling hospital discharge policies for patients with pneumonia-related sepsis*; September; 853
Krieger, U.R.; *Book Review of Queueing Networks and Markov Chains, 2nd Edition*; May; 567

Lamiri, M.X. Xie and S. Zhang; *Column generation approach to operating theater planning with elective and emergency patients*; September; 838
Lawley, M. and K. Muthuraman; *A stochastic overbooking model for outpatient clinical scheduling with no-shows*; September; 820
Liu Y.-W. and K.C. Kapur; *New patient-centered models of quality-of-life measures for evaluation of interventions for multi-stage diseases*; September; 870

Muthuraman, K. and M. Lawley; *A stochastic overbooking model for outpatient clinical scheduling with no-shows*; September; 820

Ordóñez, F., I. Sungur and M. Dessouky; *A robust optimization approach for the capacitated vehicle routing problem with demand uncertainty*; May; 509

Pilla, V.L., J.M. Rosenberger, V.C.P. Chen and B. Smith; *A statistical computer experiments approach to airline fleet assignment*; May; 524

Rardin, R., J. Benneyan and S. Kachhal; *Foreword*; September; 799
Roberts, M.S., J.E. Kreke, M.D. Bailey, A.J. Schaefer and D.C. Angus; *Modeling hospital discharge policies for patients with pneumonia-related sepsis*; September; 853
Rosenberger, J.M., V.L. Pilla, V.C.P. Chen and B. Smith; *A statistical computer experiments approach to airline fleet assignment*; May; 524

Sabuncuoglu, I., M.M. Fadiloglu and S. Çelik; *Variance reduction techniques: Experimental comparison and analysis for single systems*; May; 538
Savachkin, A.A., T.K. Das and Y. Zhu; *A large-scale simulation model of pandemic influenza outbreaks for development of dynamic mitigation strategies*; September; 893
Schaefer, A.J., J.E. Kreke, M.D. Bailey, D.C. Angus and M.S. Roberts; *Modeling hospital discharge policies for patients with pneumonia-related sepsis*; September; 853
Schaefer, A.J., S.M. Shechter and M.D. Bailey; *A modeling framework for replacing medical therapies*; September; 861
Scherrer, C.R., P.M. Griffin and J.L. Swann; *Optimization of community health center locations and service offerings with statistical need estimation*; September; 880
Shechter, S.M., M.D. Bailey and A.J. Schaefer; *A modeling framework for replacing medical therapies*; September; 861
Smith, B., V.L. Pilla, J.M. Rosenberger and V.C.P. Chen; *A statistical computer experiments approach to airline fleet assignment*; May; 524
Sungur, I., F. Ordóñez and M. Dessouky; *A robust optimization approach for the capacitated vehicle routing problem with demand uncertainty*; May; 509
Swann, J.L., P.M. Griffin and C.R. Scherrer; *Optimization of community health center locations and service offerings with statistical need estimation*; September; 880

Taboada, H.A. and D.W. Coit; *Multi-objective scheduling problems: Determination of pruned Pareto sets*; May; 552

Xie, X., M. Lamiri and S. Zhang; *Column generation approach to operating theater planning with elective and emergency patients*; September; 838

Zhang, S., M. Lamiri and X. Xie; *Column generation approach to operating theater planning with elective and emergency patients*; September; 838
Zhu, Y., T.K. Das and A.A. Savachkin; *A large-scale simulation model of pandemic influenza outbreaks for development of dynamic mitigation strategies*; September; 893

QUALITY & RELIABILITY ENGINEERING

AUTHOR INDEX FOR 2008

Ahn, J., J.S. Hong, H.-Y. Koo and C.-S. Lee; *Forecasting service parts demand for a discontinued product*; July; 640

Apley, D.W., W. Jiang and L. Shu; *Adaptive CUSUM procedures with EWMA-based shift estimators*; October; 992

Ben-Gal, I., R. Katz and Y. Bukchin; *Robust eco-design: A new application for air quality engineering*; October; 907

Bukchin, Y., I. Ben-Gal and R. Katz; *Robust eco-design: A new application for air quality engineering*; October; 907

Cassady, C.R., T.G. Yeung and K. Schneider; *Simultaneous optimization of $\bar{X}$ control chart and age-based preventive maintenance policies under an economic objective*; February; 147

Chou, R.-J., S.-P. Lee and S.-T. Tseng; *Stability and performance of a double MEWMA controller for drifted MIMO systems*; July; 690

Ding, Y., H. Xia and J. Wang; *Gaussian process method for form error assessment using coordinate measurements*; October; 931

Elwany, A.H. and N.Z. Gebraeel; *Sensor-driven prognostic models for equipment replacement, spare parts inventory*; July; 629

Gebraeel, N.Z. and A.H. Elwany; *Sensor-driven prognostic models for equipment replacement, spare parts inventory*; July; 629

Ha, C. and W. Kuo; *Initial allocation compensation algorithm for redundancy allocation: The scanning heuristic*; July; 678

Hong, J.S., H.-Y. Koo, C.-S. Lee and J. Ahn; *Forecasting service parts demand for a discontinued product*; July; 640

Jain, S., O.G. Okogbaa, W. Otieno and X. Peng; *Transient analysis of maintenance intervention of continuous multi-unit systems*; October; 971

Jayaraman, R., T.I. Matis and A. Rangan; *Optimal price and pro rata decisions for combined warranty policies with different repair options*; October; 984

Jiang, W. and K.-L. Tsui; *A theoretical framework and efficiency study of multivariate statistical process control charts*; July; 650

Jiang, W., L. Shu and D.W. Apley; *Adaptive CUSUM procedures with EWMA-based shift estimators*; October; 992

Jin, N., L. Zeng and S. Zhou; *Multiple fault signature integration and enhancing for variation source identification in manufacturing processes*; October; 919

Joseph, V.R. and I-T. Yu; *Optimal specifications for degrading characteristics*; February; 102

Katz, R., I. Ben-Gal and Y. Bukchin; *Robust eco-design: A new application for air quality engineering*; October; 907

Koo, H.-Y., J.S. Hong, C.-S. Lee and J. Ahn; *Forecasting service parts demand for a discontinued product*; July; 640

Kuo, W. and C. Ha; *Initial allocation compensation algorithm for redundancy allocation: The scanning heuristic*; July; 678

Kuo, W. and T. Yuan; *A model-based clustering approach to the recognition of the spatial defect patterns produced during semiconductor fabrication*; February; 93

Lakshmivarahan, S.; *Book Review of Probability and Random Processes*; February; 160

Lee, C.-S., J.S. Hong, H.-Y. Koo and J. Ahn; *Forecasting service parts demand for a discontinued product*; July; 640

Lee, S.-P., R.-J. Chou and S.-T. Tseng; *Stability and performance of a double MEWMA controller for drifted MIMO systems*; July; 690

Matis, T.I., R. Jayaraman and A. Rangan; *Optimal price and pro rata decisions for combined warranty policies with different repair options*; October; 984

Nenes, G. and G. Tagaras; *An economic comparison of CUSUM and Shewhart charts*; February; 133

Okogbaa, O.G., W. Otieno, X. Peng and S. Jain; *Transient analysis of maintenance intervention of continuous multi-unit systems*; October; 971

Otieno, W., O.G. Okogbaa, X. Peng and S. Jain; *Transient analysis of maintenance intervention of continuous multi-unit systems*; October; 971

Peng, X., O.G. Okogbaa, W. Otieno and S. Jain; *Transient analysis of maintenance intervention of continuous multi-unit systems*; October; 971

Perry, M.B. and J.J. Pignatiello; *A change point model for the location parameter of exponential family densities*; October; 947

Pignatiello, J.J. and M.B. Perry; *A change point model for the location parameter of exponential family densities*; October; 947

Qiu, P.; *Distribution-free multivariate process control based on log-linear modeling*; July; 664

Ramirez-Marquez, J.E.; *Holistic reliability analysis of weighted voting systems from a multi-state perspective*; February; 122

Rangan, A., T.I. Matis and R. Jayaraman; *Optimal price and pro rata decisions for combined warranty policies with different repair options*; October; 984

Schneider, K., T.G. Yeung and C.R. Cassady; *Simultaneous optimization of $\bar{X}$ control chart and age-based preventive maintenance policies under an economic objective*; February; 147

Shu, L., W. Jiang and D.W. Apley; *Adaptive CUSUM procedures with EWMA-based shift estimators*; October; 992

Tagaras, G. and G. Nenes; *An economic comparison of CUSUM and Shewhart charts*; February; 133

Tseng, S.-T., S.-P. Lee and R.-J. Chou; *Stability and performance of a double MEWMA controller for drifted MIMO systems*; July; 690

Tsui, K.-L. and W. Jiang; *A theoretical framework and efficiency study of multivariate statistical process control charts*; July; 650

Tsung, F. and L. Xiang; *Statistical monitoring of multi-stage processes based on engineering models*; October; 957

Wang, J., H. Xia and Y. Ding; *Gaussian process method for form error assessment using coordinate measurements*; October; 931

Xia, H., Y. Ding and J. Wang; *Gaussian process method for form error assessment using coordinate measurements*; October; 931

Xiang, L. and F. Tsung; *Statistical monitoring of multi-stage processes based on engineering models*; October; 957

Yeung, T.G., C.R. Cassady and K. Schneider; *Simultaneous optimization of $\bar{X}$ control chart and age-based preventive maintenance policies under an economic objective*; February; 147

Yu, I-T. and V.R. Joseph; *Optimal specifications for degrading characteristics*; February; 102

Yuan, T. and W. Kuo; *A model-based clustering approach to the recognition of the spatial defect patterns produced during semiconductor fabrication*; February; 93

Zeng, L. and S. Zhou; *Variability monitoring of multistage manufacturing processes using regression adjustment methods*; February; 109

double MEWMA (dMEWMA) controller, 690

ecological design, 907
economic design, 133
eigenprojection, 919
EM algorithm, 957
EWMA, 992
exponential family, 947

fault diagnosis, 919
fault signature, 919
fault-tolerance, 971
forecasting, 640
form tolerance, 931

Gaussian process, 931
general repair, 984
Generalized likelihood ratio test, 650
generalized linear model, 947
green manufacturing, 907
group charts, 957

integrated signature, 919
intervention analysis, 971

linear state space model, 957
log-linear modeling, 664

maintenance decision problem (MDC), 971
manufacturing target, 102
Markov chain, 992
maximum likelihood estimation, 947
measurement errors, 109
minimal repair, 984
mixture model, 93
model-based clustering, 93
multi-stage process, 957
multi-state reliability, 122
multiple-input and multiple-output (MIMO), 690
multistage processes, 109
multivariate distribution, 664
multivariate EWMA (MEWMA) controller, 690

non-Gaussian data, 664
nonparametric procedures, 664

opportunistic maintenance (OM), 971
optimal discount matrix, 690
optimization, 122

partially observable Markov decision processes, 147
pattern recognition, 93
preventive maintenance, 147
pro rata warranty, 984
process disturbance, 690
process improvement, 947
product design, 102

quality, 102
quality control, 147, 947

random manufacturing error, 931
redundancy allocation, 678
regression adjustment, 109
regressor selection, 109
reliability optimization, 678
reliability, 102
replacement models, 629
run-to-run process control, 690

scanning heuristic, 678
service parts, 640
Shewhart chart, 133
simulation, 122
spare parts inventory, 629
spatial model, 931
special-cause identification, 947
stability conditions, 690
statistical process control, 650, 664, 947

stochastic model, 640
systematic manufacturing error, 931

T^2 test, 650
transient analysis, 971
unimodularity, 971
union-intersection test, 650

variation propagation, 109
voting systems, 122

REFEREES FOR 2008

Umit Akinc, Wake Forest University
Hanan Mohamed Aly, Cairo University, Egypt
Francisco Aparisi, Universidad Politecnica de Valencia, Spain
Mohamed Azaiez, King Saud University

Irad E. Ben-Gal, Tel Aviv University
Barbara Bennie, University of Wisconsin–La Crosse
Christophe Berenguer, Universite de Technologie de Troyes, France
Sergiy Butenko, Texas A&M University

Jaime Camelio, Michigan Tech University
Argon Chen, National Taiwan University, Taiwan
Victoria Chen, University of Texas
Yun-Shiow Chen, Yuan Ze University, Taiwan
Byung-Rae Cho, Clemson University
Ali Cinar, Illinois Institute of Technology

Yuanshun Dai, University of Tennessee
Kanchan Das, East Carolina University
Savas Dayanik, Princeton University
Yu Ding, Texas A&M University
Boualem Djehiche, Royal Institute of Technology, Sweden

Popova Elmira, University of Texas
Jose Espiritu, University of Texas at El Paso

Qianmei Feng, University of Houston

Rajesh Ganesan, George Mason University
Olivier Gaudoin, INP Grenoble, France
Nagi Gebraeel, Georgia Institute of Technology
Huairui Guo, ReliaSoft Corp.
Renkuan Guo, University of Cape Town, South Africa
Ulku Gurler, Bilkent University

Christian Hansen, Eastern Washington University
Engshwe Ho, Glatfelter
Chun-Chin Hsu, Chaoyang University of Technology, Taiwan
Qingpei Hu, Chinese Academy of Sciences, China
Qiang Huang, University of South Florida
Wenzhen Huang, University of Massachusetts–Dartmouth
Kin-Ping Hui, Defence Science and Technology Organisation, Australia
Xiaoming Huo, Georgia Institute of Technology

Luis Eduardo Izquierdo, University of Warwick

Chin-Chia Jane, Ling Tung University, Taiwan
J. Jaturonnatee, Thammasat University, Thailand
Kouroush Jenab, Reyerson University
Myong Jeong, Rutgers University
Renyan Jiang, Changsha University of Science and Technology, China
Wei Jiang, Stevens Institute of Technology
Jionghua (Judy) Jin, The University of Michigan

Kwang-Jae Kim, POSTECH
Kyungmee Kim, Konkuk University, South Korea
Seong-Hee Kim, Georgia Institute of Technology
Seoung-Bum Kim, University of Texas at Arlington
Young Jin Kim, Pukyong National University, South Korea
Abdullah Konak, Penn State
Zhenyu (James) Kong, Oklahoma State University
C. K. Kwong, Hong Kong Polytechnic University

Young Jou Lai, Halliburton
Chenhua Li, Northeastern University
Jing Li, Arizona State University
Xueping Li, University of Tennessee–Knoxville
Yun-Chia Liang, Yuan-Ze University, Taiwan
Haitao Liao, Wichita State University
Zhaoheng Liu, ETS, Canada
Jye-Chyi Lu, Georgia Institute of Technology
Michael Luvalle, OFS

John McCool, Penn State
Terrence E. Murphy, Yale University
Joseph Murray, MIT

Mustapha Nourelfath, Universite Laval, Canada

Rong Pan, Arizona State University
Mee Young Park, Google
Marcus B. Perry, Florida International University
Marcus Perry, University of Alabama in Tuscaloosa
John Price, Monash University

Zhiguang (Peter) Qian, University of Wisconsin-Madison

Hendry Raharjo, Chalmers University, Sweden
Anisur Rahman, Griffith University, Australia
Jose Ramirez-Marquez, Stevens Institute of Technology
Marion R Reynolds Jr., Virginia Tech
George Runger, Arizona State University

Tom Samuel, Sabre Airline Solutions
Michele Scagliarini, University of Bologna, Italy
Alex Schumacher, HAW-Hamburg, Germany
Abbas Seifi, Amirkabir University, Iran
Nicoleta Serban, Georgia Institute of Technology
Xuemei Shan, Northwestern University
Judong Shen, GlaxoSmithKline
Weiming Shen, NRC Canada
Sangmun Shin, Inje University, Korea
Lianjie Shu, University of Macau, Macau
S. Y. J. Shyu, Ming Chuan University, Taiwan
Ross Stewart Sparks, Commonwealth Scientific and Industrial Research Organisation

Yuan Tao, The University of Tennessee
Heidi Taboada, University of Texas at El Paso
Loon Ching Tang, National University of Singapore
M. C. Testik, Hacettepe University
Zhigang Tian, Concordia University
G. Tontini, Universidade Regional de Blumenau, Brazil
Michael Tortorella, Rutgers University
Sheng-Tsaing Tseng, National Tsing Hua University

Cenk Undey, Amgen, Inc.

Johan van Dorp, George Washington University
Roshan Joseph Vengazhiyil, Georgia Institute of Technology
J. K. Vermunt, Universiteit van Tilburg, The Netherlands

Kaibo Wang, Tsinghua University
Wenbin Wang, University of Salford
Jim Wilson, North Carolina State University
William Woodall, Virginia Tech
Ful-Chiang Wu, Vanung University, Taiwan
Shaomin Wu, Cranfield University, UK
Zhang Wu, Nanyang Technological University

Haifeng (Heidi) Xia, Texas A&M University
Min Xie, National University of Singapore

Edwin Yaz, Marquette University
Jinn-Yi Yeh, National Chiayi University, Taiwan
Thomas Yeong, Ecole des Mines de Nantes
Won Young Yun, Pusan National University, South Korea

Paul Zantek, Univeristy of Minnesota
Hang Zhang, Arizona State University
Changliang Zhou, NanKai University, China
Shiyu Zhou, University of Wisconsin, Madison
